Abstract (en)
A method of preparing a cleaning tablet which has a plurality of discrete regions with differing compositions, characterised in that at least one first region of the tablet is a solid region of compacted particulate material and at least one second region of the tablet is a sprayed region and said method comprising the steps of (a) compressing a particulate composition to form said first region of compacted particulate material; (b) subsequently spraying a liquid composition onto the upper surface of said first region wherein the spraying is limited to said upper surface; and (c) solidifying said liquid composition to form said second phase of the cleaning tablet.
