Abstract (en)

A stove hood has a lower hood opening (2) and an outlet (17) arranged on the top for connection to a ventilation duct for suction of air from the room in which the stove hood is intended to be located. A fan (10) is arranged inside the stove hood between the hood opening and the outlet for generating said suction. A filter (19) for grease and the like is arranged in the stove hood upstream the fan. The fan is a radial fan designed to suck air axially only from a first side, and it is arranged with its side opposite to said first side with respect to the axial direction at a substantially vertical delimiting wall (14) of the stove hood. <IMAGE>
