Abstract (en)

[origin: WO2004002248A2] A method of forming an undergarment (10) is provided. The method includes inserting an adhesive layer (36) between a first fabric layer (32) and a second fabric layer (34) to form a fabric sub-assembly (64), the sub-assembly having a periphery that is larger than an outer periphery of the undergarment; causing the adhesive layer to form a laminate (66) from the sub-assembly; and removing a trim from the laminate at the outer periphery to form a finished edge (30) of the undergarment, wherein the first and second fabric layers comprise at least one cotton material.
