Abstract (en)

[origin: WO2004000080A1] The invention relates to an administration form for orally administering active substances, vitamins, and/or nutrients, comprising a drinking straw that is provided with a cap. Said cap comprises a pierceable bottom that is made of an optionally laminated aluminum-plastic film or cellulose film or a shock-proof plastic bottom which is removable by a pushing movement and is at least partly recessed via a weakening line as a sealing device. Also disclosed are a kit comprising said administration form and a conveying liquid, and a method for producing the administration form.
