Abstract (en)
[origin: WO03106379A1] The invention relates to a method for exchanging substituents in organic compounds, for example, chlorine for fluorine. The method involves the use of a catalyst of formulas (IVa), (IVb) or (IVc), wherein: radicals R2 to R17, independent of one another, represent hydrogen, aliphatic, cycloaliphatic, aromatic or araliphatic groups; A<q> represents a q-valent anion, and q is an integer ranging from 1 to 3.
