Abstract (en)

[origin: WO2004003941A1] The invention concerns a device comprising a sleeve (22) designed to be engaged on a cable (3) and whereof the outer surface includes marks for identifying the cable concerned. The sleeve is flattened, and a section of the sleeve is closed (23) over at least part of the width of said sleeve, the unclosed part delimiting a passage for the cable (3).
