Abstract (en)
[origin: WO2004006489A1] The invention relates to method for matching the rate with a predetermined data rate. According to the method, the data whose data rate is matched is composed of at least two coded data streams and the rate of the data rate of the at least two data streams is matched with the predetermined data rate using a rate matching pattern by means of which the schema for repeating or puncturing individual data sequences from the data streams is determined and which is identical for the at least two data streams.
