Abstract (en)

[origin: WO2004002179A1] The invention concerns a method for supplying service configuration data to a mobile telephone device (1) equipped with means for managing AT commands (6). Said method consists in setting up a connection between the device (1) and a computerized terminal (7) including service configuration data and in exchanging service configuration data between the terminal (7) and the device (1) using selected AT commands, capable of being interpreted by the AT command management means (6) of the device.
