Abstract (en)

[origin: EP1518714A1] A sewing station (130) for a bookbinding machine (100) is proposed. The sewing station has at least one sewing unit (203) including a needle (205) and a hook needle (210) for sewing blocks of signatures (105) in succession using a continuous thread (310), and a cutting device (220) having means (305) for engaging the thread in the proximity of the needle after sewing a last signature of each block and means (305c,315) for cutting the engaged thread; the sewing station further includes means (240-255) for moving the cutting device to an operative position between the needle and the hook needle after engaging the thread, the thread being cut in the operative position. <IMAGE>
