Abstract (en)

[origin: EP1518951A2] The thread for heat and fire protection textile materials comprises a core (132) with a given twist direction and a minimum twist coefficient of about 80, and a cover element (134) with a twist direction corresponding to that of the core. Independent claims are also included for: (a) a method for producing the proposed thread (b) a textile material containing the proposed thread.
