Abstract (en)

[origin: EP1519122A1] The heat exchanger unit for a heating device has a medium flow chamber formed in a housing (18) and through which flows the medium to be thermally treated, and at least one pipe connector (38) on the housing for the connecting of a flow medium ducting line. The connector is separate from the housing, and a connector socket (42) is formed in the housing and in which the pipe connector is housed and supported by a connecting section (44).
