Abstract (en)

[origin: EP1519456A1] The device has a connecting unit (16) to be engaged electrically and mechanically in a socket (2). The connecting unit is connected electrically to a connector (14) for equipment. The connector is disposed in a covering case (12) that is connected mechanically to the connecting unit such that the case is integrated with the socket. The case has a cavity (20) extending from a support plane surface (18) to receive the socket.
