Abstract (en)
[origin: WO2004004631A2] This is a 100% herbal medicine completely free from synthetical chemicals. It is considered an alternative for the common antibiotics based on synthetical compounds that are used for the treatment of the upper respiratory system infections. This invention is a greenish-brown semi solid mixture of herbs provided in an acidic media. It is an oral syrup drug taken through mouth. This medicine was proved effective on both viral and bacterial infections unlike synthetical antibiotics that deal with bacterial infections only. This medicine is different from other herbal drugs as it cures the causes and not only the symptoms of the disease in a limited period of time extending from 3-7 days. It gives energy and strength to the human body as it raises the level of immunity.
