Abstract (en)
[origin: WO2004002689A1] The invention relates to a handle of a machine-tool (10), especially a manual machine-tool. Said handle comprises a grip element (12) which can be fixed to the handle (18) by means of a locking element (14, 16). According to the invention, when the grip element (12) is locked onto the handle (18), the locking element (14, 16) can be operated by a means (20) and brought into a release position.
