Abstract (en)

[origin: WO2004005029A1] The device comprises a round cylindrical ultrasound generator (5), adjustable relative to the rotating body with radial emission. The ultrasound generator (5) has a soft coating on the outer surface thereof which may be wetted with cleaning fluid (11.2). The above is driven in rotation about an axis (6) parallel to the axis (10) of the rotating body.
