Abstract (en)
[origin: WO2004005866A1] A pocket knife having at least one pull-out cutting tool or blade, provided on at least one side with a lateral covering covering said knife, and at least three blockable assembly axes which hold together the knife or the cutting tool in a pull-out or retracted position. A weighing element is arranged inside the pocket knife (1). Said element can be extracted about at least one of the axes (9,10) or at least one other axis (11) and/or is displaceably mounted during weighing. The weighing element (13) is actively connected to a transmitting device (21) in order to transmit the weight that is to be measured to a measuring sensor (23).
