Abstract (en)

[origin: EP1521142A1] The timepiece has a mechanical regulator that is provided with a hairspring (21) associated with a pendulum. The pendulum is rotatably mounted between a plate and a balance bridge (23), and has a felloe with a pair of permanent magnets. The direction of magnetization is parallel to the axis of pendulum. An electronic regulator has a fixed coil (12) arranged to cooperate with the magnets via electromagnetic coupling.
