Abstract (en)  
[origin: FR2840801A1] A composite prosthetic implant comprising a textile support of which at least a portion of its surface is coated with a lyophilate of biocompatible material comprising as its principal component on or more of hyaluronic acid, alginates, polypeptides or polycaprolactone or one or more of their derivatives. An Independent claim is included for a method of preparing the prosthetic implant by impregnating a textile support with the biocompatible material and the lyophilizing.
