Abstract (en)
[origin: US2005115406A1] An electric oil separator that separates oil from an airflow of a ventilator. The separator includes an emission electrode and a collecting electrode. Moreover, the separator includes an injection device structured and arranged to inject oil as a cleaning fluid onto at least one of the emission electrode and the collecting electrode. The instant abstract is neither intended to define the invention disclosed in this specification nor intended to limit the scope of the invention in any way.
