Abstract (en)
[origin: US2004244296A1] A locking device for a sash of a hung sash window includes a movable mushroom-shaped locking pin disposed on the first movable sash and a lock engaging element disposed on the window jamb or the rail of the second sash. The locking pin can be actuated by a driving rod located in a driving rod mounting. The lock engaging element is in the form of a laterally open profiled part which has an inverted Omega-(omega) shaped cross-section that is complementary to the shape of the locking element.
