Abstract (en)

[origin: EP1522391A1] Machine tool comprises a side wall (22, 22') which can be partially lifted on a water basin (9), and sliding units arranged on further side walls (35) lying next to the side walls (22, 22') to allow extension of a frame with workpieces. An independent claim is also included for a process for operating the machine tool. Preferred Features: A frame with workpiece supports is provided outside of the side wall to which the basin is attached. An equalizing container is arranged in or under the water basin and is impinged with a compressed air source. A cleaning station is arranged above the lifted side wall.
