Abstract (en)

The present invention provides a linear-motor-driven machine for precise positioning of items to be printed and/or varnished. <??>The linear electric motor (1) controls the stroke of the feed carriage (2) which is equipped with the mandrels (8), whereon printed and/or varnished items are put. The feed carriage (2) with the mandrels (8) moves with respect to the printing units having (4) the matrix (6) and squeegee (17) system. <IMAGE>
