Abstract (en)

[origin: EP1522654A2] The tool (1) for the pointing of joints has an inlet opening (9) for the pointing material and at least one outlet opening (10). The two openings are interconnected by a passage (11). The tool on one end is bevelled in roof form by two opposite lying bevels (6a,6b). The intersecting edge of the two bevels is formed at least partially as a sharp edge (7) and partially as a rounding (8). The outlet opening for the pointing material is located between the sharp edge section and rounded section. An independent claim is included for.
