Abstract (en)

[origin: WO2004005217A1] The invention relates to a drillable natural fertiliser and to a method for producing the same. The aim of the invention is to provide a natural fertiliser based on horse manure and a method for producing said fertiliser which is simple, cost-effective and ecologically harmless and provides the fertiliser with good application properties. To this end, a natural fertiliser is produced, consisting of formed and dried horse droppings. The method for producing said fertiliser is characterised in that the horse droppings are collected and processed within a specific time frame.
