Abstract (en)
[origin: WO2004007455A1] The invention relates to heterocyclically substituted benzoylureas, in addition to their physiologically compatible salts and physiologically functional derivatives. The invention relates in particular to compounds of formula (I), in which the groups are defined as cited in the description, in addition to their physiologically compatible salts and to a method for producing said compounds. The compounds are suitable e.g. for treating type 2 diabetes.
