Abstract (en)
[origin: WO2004017468A1] The invention relates to a plug guide (7) for connecting a plug (3) on a first circuit board (1) to a mating connector (4), or a plug receiving element, on a second circuit board (3). The first circuit board (1) is used for a display of a digital tachograph and the second circuit board (3) is a system circuit board inside a housing for the digital tachograph. According to the invention, the plug (2) on the first circuit board (1) is provided with a plug guide (7) in order to prevent the risk of mis-insertion during the insertion thereof which cannot be visually monitored. Said plug guide (2) essentially surrounds the plug (7) in a u-shaped manner and is secured in relation to the plug.
