Abstract (en)
[origin: EP1523907A2] Shelving system, especially for mobile use in a vehicle, comprises uprights (10, 11) and at least one horizontal insert (12, 14). The upright has at least one fitting surface (13) for the form- and force-locking arrangement of a corresponding counter-surface (50) of the insert. The fitting surface is provided with a groove (36) or a lug (40) for mutually engaging in a complementary lug or groove in the counter-surface of the insert. Preferred Features: The upright is provided with fitting surfaces in a mirror-symmetrical manner so that an insert part can be arranged on both sides of the upright.
