Abstract (en)

[origin: EP1524166A1] The points operating system (1) has several drives (4) at different places along the points (2) and which have at least one points blade (3). The drives are constructed as electric drives which have at least one electric motor, whereby the coupling (5) which interconnects the drives is also electric and has a cable distributor through which the electric motors are interconnected. The coil of the electric motor of one drive is connected in parallel to a coil of an electric motor of any other drive.
