Abstract (en)

[origin: EP1524221A1] The station has an upper cradle (2) comprising a slide (2a) for alternatively mounting a border separation device and a full sheet receiving device. A cam (24) is arranged in the path of a roll lever (23b) for opening pliers (23a) of a pliers bar (23) during mounting of the sheet receiving device. The pliers are not opened for permitting the bar to evacuate the wastes after separation of the border while border separation device is mounted.
