Abstract (en)

[origin: EP1524359A1] Household-type clothes drying machine comprising a rotating drum holding the clothes to be dried, means adapted to circulate a flow of hot drying air through said drum, means adapted to condense the moisture contained in said drying air, a pull-out container (1) adapted to collect and contain the water resulting from said preceding condensation of the moisture contained in the drying air, a lid (3) capable of being opened from outside and adapted to enable access to be gained to said pull-out container, in which said lid is provided with a pressure member (4) adapted to push said container inwardly as said lid moves into closing; said pressure member is applied on the inner face of said lid and is adapted to rotate relative to said lid with the aid of a pin means (5) secured to said lid; between said pressure member and said inner face of said lid there are provided abutment means adapted to delimit at a pre-determined distance the displacement extent of said pressure member (4) towards said lid. <IMAGE>
