Abstract (en)
The invention relates to a profiled building component intended to be mounted at the outside of a structure, e.g. in the shape of an outer wall, roof or inner wall structure, comprising an outer wall part (5), and inner part (3) and an intermediate connecting plate part (4), said inner part (3) being a fastening part for fastening the building component to a structure, said fastening part (3) being further designed to fasten or couple at least one finishing plate (2) to it and/or being designed for providing support and/or connection to at least one finishing plate (2). <IMAGE>
