Abstract (en)

The present invention regards a pin or rod (10) for activating devices for opening and/or closing doors and windows comprising an end section (10') destined to be inserted in a complementary adaptor (13) housed in the device and provided with at least one radial projection (14) designed to achieve a forced fit between pin (10) and adaptor (13) to block the former inside the latter in a position determined on the basis of the thickness of the door or window. <IMAGE>
