Abstract (en)

[origin: FR2858645A1] The module has a carriage (30) including a support roller movable with respect to a base body. The carriage is movable while sliding with respect to a carriage support (32), along an articulation axis (C-C) over a distance. The support has a centering unit to maintain the support along a direction of maintenance. A door (8) has a door leaf (10) sliding with respect to a structure between open and closed positions.
