Abstract (en)  
[origin: EP1524401A1] Clamping holder comprises a side (7) of an L-shaped holding part (2) having a groove (8) open to a clamping flange (25), and a threaded spindle (4) located on the side of the L-shaped holding part so that it is arranged in the groove. Preferred Features: A guiding element (22) is supported on the inner periphery (23) of the groove. The width of the groove is more than its depth. The guiding element has its maximum extension in the direction of the axis of the threaded spindle.
