Abstract (en)
[origin: EP1524725A1] The electronic module has a housing (13) enclosing an electronic circuit device, connected to at least one cylindrical current rail (16) fitting through an opening in the housing. The current rail has a plate-shaped termination tag (24), projecting through an opening of a base plate (28) of a termination unit (26) and secured in position by a retaining element (58,86) on the inside of the termination unit. An independent claim for an assembly method for an electronic module is also included.
