Abstract (en)  
[origin: WO03069633A2] The invention relates to a protective wall (12) with anti-piercing armour for a container, said wall (12) comprising support means (20) and the following respective superimposed elements (24,26,28,30,32): an external sheet (24), a first layer of cushioning (26), an intermediate sheet (28), a second layer of cushioning (30) and an internal sheet (32). According to the invention, the intermediate sheet (28) is non-rigidly fixed in relation to the support means (20). The invention further relates to a container (1) comprising at least one protective wall (12) as above. The invention finds application in the field of transport of nuclear materials.
