Abstract (en)

[origin: EP1526000A2] An appointments calender is designed for parallel use, enabling the user to postpone selection of the next set of working notes with respect to the section containing dates and records of appointments. Pages (at right) making up the notes section (1) and the appointments section (2) (at left) can be turned over esp. independently and separately from each other. The two sections are fixed to the same spine on the rear face (6).
