Abstract (en)

[origin: EP1526194A2] The spinning machine has a multi-stage sliver drawing unit (13), with a mechanical condenser (45) between the upper rollers (26,27) at the outlet end with the large lower roller (25). The condenser bonds the sliver fibers together before being twisted by the spinner. The condenser surface carries ribs or burrs, and it is of a magnetic material to be held against the lower roller.
