Abstract (en)

[origin: EP1526204A2] The assembly for dyeing textile piecegoods has a vessel (1) with fabric holding areas (3) where the fabrics are moved through by a jet system, with at least two separate and axially adjacent transport jets (9). Each jet carries a fabric strand, and they are on a common transport medium distribution unit (16) using a gas of air or an air/steam mixture, linked to a transport medium recirculation system (21,22,25).
