Abstract (en)

Comprised of a body (2) determining a large cavity (6) with at least one side widening (7) and a cover (1) that covers the upper peripheral edge of the body (2), with orifices (5) for attachment to the engine block. At the area where the side widening (7) is established, the body (2) incorporates housings (4) where orifices (8-8') are established vertically aligned with the orifices (5) for attaching the cover (1), the cover orifices (5) provided in this area being concealed inside the body (2).
