Abstract (en)
A built-in refrigerator comprises a refrigerated compartment and a base portion containing a condenser (14), a fan (12) and a compressor (16), said base portion having an open rear face (18a) adapted to face a house wall (W) where the refrigerator is adapted to be installed. The rear face of the base portion is provided with a gasket (22) adapted to cooperate with said house wall (W) in order to define an air suction mouth upstream the condenser (14).
