Abstract (en)
[origin: FR2843311A1] The fixing comprises a connection part (14) to the boot which can be displaced relative to the ski between bottom and top positions. It comprises a compression spring (22) for returning the connection part to its bottom position. The connection part comprises a catch (23) able to move between open and closed positions in the latter of which it engages an anchoring connected to the boot. The catch is brought back to its closed position by the compression spring.
