Abstract (en)

[origin: US2006174675A1] The invention relates to an extruder (1), in particular for producing curved extrusion products. According to the invention, the extrusion product is formed and subsequently curved or bent by the action of external forces in a mould (11), which is located on a counter tie-bar (8) of the extruder and usually comprises a pressure part (9) and a die holder (14) that houses the die (13). The entire mould (11) is located in the counter tie-bar (8)
