Abstract (en)

[origin: DE10234364A1] Glass-ceramic composite material comprises: (a) a ceramic filler; and (b) a glassy matrix containing lithium, silicon, aluminum and oxygen with a crystalline phase. Independent claims are also included for the following: (1) ceramic foil, ceramic layer composite or micro-hybrid made from the glass-ceramic composite material; and (2) process for the production of a glass-ceramic composite material, a ceramic foil, a ceramic layer composite or micro-hybrid.
