Abstract (en)
[origin: WO2004018602A1] AbstractThe invention relates to the use of a water-soluble random copolymer of vinyl pyrrolidone and vinyl acetate in a laundry detergent composition to improve the oily soil detergency of the composition. The copolymer preferably contains from 50 to 70 mole% of vinyl pyrrolidone monomer units and from 30 to 50 mole% of vinyl acetate units. The copolymer is suitably used in amounts of from 0.5 to 3 wt%, preferably from 1 to 2 wt%. Preferably the detergent composition contains a sulphonate anionic detergent such as linear alkylbenzene sulphonate.
