Abstract (en)

[origin: WO2004021243A2] The invention relates to the analysis of the activity of a pharmaceutical preparation or medicament on a neuronal structure. According to the invention, a neuronal structure is subjected to the influence of a pharmaceutical preparation, signals describing neuronal activities in the neuronal structure under the influence of said pharmaceutical preparation are detected, and said signals are statistically evaluated in such a way that indicators are determined for the neuronal structure under the influence of the pharmaceutical preparation, said indicators describing the activity of the pharmaceutical preparation.
