Abstract (en)

[origin: EP1528031A1] The releasable fastening of especially a wire cable (2) to a cable drum (1), has a connecting piece through which the cable is fastened by a thickened section to the drum in the region of a through-hole in the drum. The connecting piece (4) is detachably fastened in the through-hole (1a), and the connecting piece is locked in the through-hole through the thickened section (2a) which is fastened to the connecting piece. The connecting piece is pushed into the through-hole from the outside and retained therein with positive locking, and the thickened section is fastened with positive locking on a part of the connecting piece protruding from the through-hole.
