Abstract (en)  
[origin: EP1528203A2] The hinge (100) has superposed parts (20) to take hinge bolts which define the hinge axis. The vertical guide faces of the holding plate (60) which are parallel to the hinge axis are formed by a projection (62) which engages in recesses (14,15) of the fixing part (10). The thread (16) in the fixing part which receives the threaded adjusting spindle is mounted close to its contact bearing face. The adjusting spindle is fixed in the adjustment direction on the projection of the holding plate.
