Abstract (en)  
[origin: WO2004004513A2] A hair styling device having a handle portion (10), at least two arms (20) extending from the handle portion (10), wherein each arm (20) has one or more heating elements (22) removably connected thereto. Advantageously, the hair styling device also has a central element between the handle portion (10) and the at least two extending arms (20), wherein the central element (22) serves as an actuator (30) for selectively adjusting the arms (20) to accommodate various types of hair having different thickness and regularity.
