Abstract (en)
[origin: WO2004018341A1] The invention relates to a winding device, particularly for a garden hose, in which a housing (1) for accommodating the hose reel is provided with an insertion guide for an insertion journal (8) that projects from a supporting body (9) on one side. Said supporting body is equipped with two fastening surfaces (11, 14) that are at a right angle to one another. One of the surfaces (11) runs parallel to the axis (8a) of the insertion journal (8), and both surfaces are provided with fastening openings (12, 15) for mounting, as desired, the supporting body on a wall or on a floor.
